

Les boîtes d'œufs : j'enlève

Date :

Les œufs sont déjà dans les boîtes. Elle barre ceux qu'on enlève : d'abord tous ceux de la deuxième boîte, pour redescendre à 10, puis ce qui reste à enlever dans la première. Elle écrit combien il reste à enlever après 10, puis le résultat.

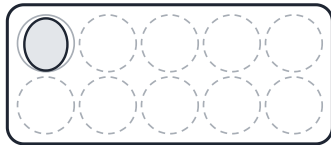

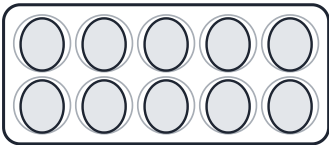

Exemple : $13 - 5 = 10 - 2 = 8$

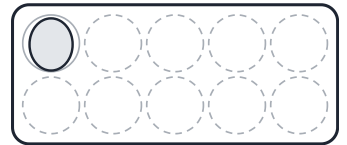

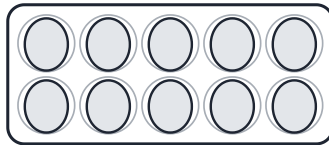

On barre les 3 de la deuxième boîte : il en reste 10. Puis encore 2 : il en reste 8.

Barre, puis complète.

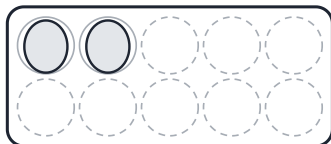

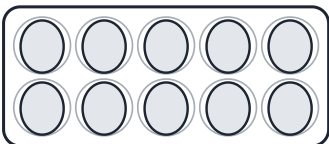

1 $11 - 8 = 10 - \square = \square$

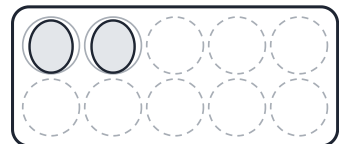

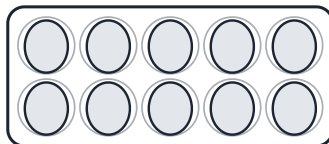

2 $11 - 3 = 10 - \square = \square$

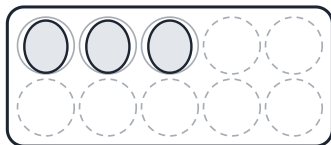

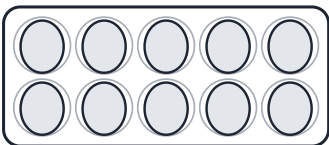

3 $12 - 5 = 10 - \square = \square$

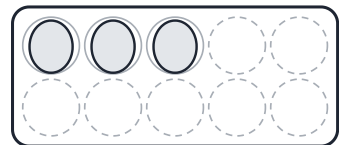

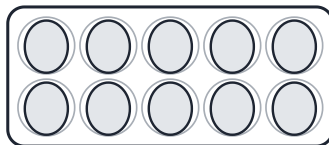

4 $12 - 7 = 10 - \square = \square$

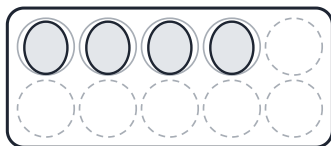

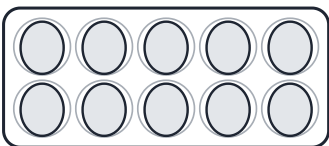

5 $13 - 7 = 10 - \square = \square$

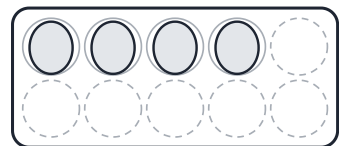

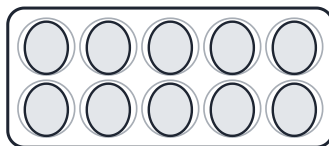

6 $13 - 8 = 10 - \square = \square$

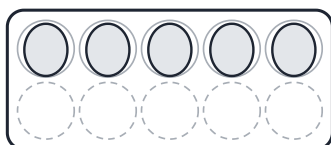

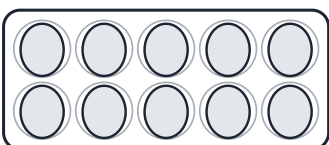

7 $14 - 5 = 10 - \square = \square$

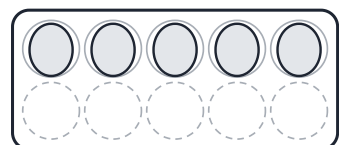

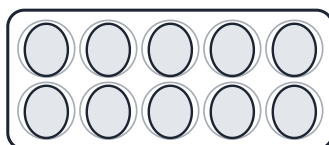

8 $14 - 6 = 10 - \square = \square$

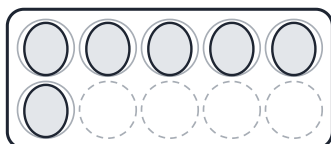

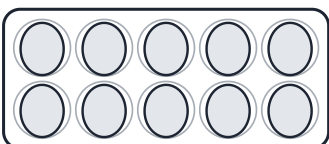

9 $15 - 8 = 10 - \square = \square$

10 $15 - 9 = 10 - \square = \square$

11 $16 - 8 = 10 - \square = \square$

12 $17 - 8 = 10 - \square = \square$
